SUMMARY

Computer Science Engineering student with strong foundations in **engineering principles, data analytics, and medical technology applications**. Proven experience in **analytical problem-solving, design reviews, and cross-functional collaboration** through internships and projects. Skilled in **Python, Java, and system integration protocols**. Eager to contribute to **intelligent medical devices and healthcare innovation** at GE HealthCare.

EDUCATION

B.Tech in Computer Science Engineering
Amrita Vishwa Vidyapeetham 2023 – 2026
GPA: **8.2/10** (Expected Graduation: 2027)
GeeksforGeeks Club IoT Lead — No Active Backlogs

EXPERIENCE

- Machine Learning Intern**
Corizo Jan 2024 – May 2024
- Applied **data analytics and engineering fundamentals** in Wine Quality Analysis achieving **85% accuracy** using Random Forest
 - Demonstrated **analytical problem-solving skills** processing and analyzing **6,000+ data records** with feature selection
 - Collaborated with **cross-functional teams** implementing hyperparameter tuning methodologies within project constraints
- Embedded Systems Engineering Trainee**
Pantech Solutions Jun 2023 – Jul 2023
- Executed **engineering design tasks** building **5+ IoT based monitoring systems**
 - Participated in **design reviews** and technical discussions for real-time healthcare applications
 - Applied **new methodologies** integrating MQTT, I2C, SPI protocols for intelligent device communication

PROJECTS

- AI-Powered IoT Smart Farming Solution** Dec 2024
- Built AI-powered solution integrating **soil sensors, weather APIs** for data-driven farming recommendations
 - Implemented real-time monitoring of **soil moisture (0-81cm), temperature, humidity** with continuous sensor-to-cloud transmission
 - Integrated **Google Cloud and Maps APIs** for scalable storage, analytics, and geospatial insights
 - Developed **ML models** for crop selection and disease prediction, improving yield efficiency
- Medical Device Automation System** May 2024
- Designed autonomous medical waste classification system achieving **86% diagnostic accuracy**
 - Applied **engineering fundamentals** in embedded system design processing **10 items/min**
 - Demonstrated **adaptability** by integrating multiple sensors and actuators for healthcare facility automation

- IoT-based Medical Monitoring System** Aug 2023
- Developed **intelligent medical device** for real-time ECG monitoring with secure data analytics
 - Applied **engineering design principles** reducing **healthcare response time by 30%**
 - Demonstrated **analytical problem-solving** implementing scalable IoT transmission protocols
 - Contributed to **healthcare technology advancement** improving **patient outcomes by 25%**

SKILLS

- Engineering & Analytics**
- Python, Java, Embedded C, Data Analytics, SQL, System Design
- Technical Proficiencies**
- Linux, Git, Arduino, Raspberry Pi, IoT Protocols, Real-time Systems
- Healthcare Technology**
- Healthcare Data Analytics, Intelligent Systems

CERTIFICATIONS

- CCNA: Introduction to Networks**
Cisco Nov 2024
- Data Science for Engineers**
NPTEL Sep 2024
- Python for Data Science**
NPTEL Feb 2024
- Introduction to IoT**
NPTEL Nov 2023

ACHIEVEMENTS

- Runners-Up** – IIIT Sri City AgriTech Hackathon 2025
- IEEE Best Paper Award** – ICPECTS 2024 (IEEE Conference)
- Innovation Winner** – Sustainathon Fluxera 2024
- Prize Winner** – Pitch Fest by E-Cell Amrita (IIT Madras)
- Technical Excellence** – Open Source Hackathon (Certifyo)

CORE COMPETENCIES

- Engineering Fundamentals Application
- Analytical Problem-Solving
- Medical Technology Integration
- Cross-functional Collaboration
- Design Review Participation
- Healthcare Data Analytics

LANGUAGES

- English** Proficient
Tamil Native
